**Subject:** Needles and syringes in 2006

Hi Julie,

I have tallied the needles and syringes that were submitted to the Boston and Amherst Labs in calendar 2006. Some of these were analyzed in 2007. I will fax you a print out of these items sorted by city (or agency). The print out lists sample number, case number (as a substitute for defendant), city, findings, date submitted and date analyzed. Check with Chuck, but I believe that he said that most or all of the not tested had other items with that defendant. If you want I can check that, but it will take about an hour. Let me know if you want it.

The totals are

|                          |       |
|--------------------------|-------|
| Not tested               | 201   |
| Heroin                   | 80    |
| Negative                 | 83    |
| Cocaine                  | 17    |
| Morphine                 | 4     |
| Fentanyl                 | 4     |
| Monoacetyl morphine      | 3     |
| Testosterone             | 2     |
| Methylphenidate          | 1     |
| Diltiazem                | 1     |
| Procaine                 | 1     |
|                          | ----- |
| Total needles & syringes | 377   |

Let me know if you need anything else.

Cam
